

How to find CG WiFi:

PC (XP & Vista)	MAC
<p>Make sure your WiFi radio is on or enabled. (Some PCs have a switch or button on the computer. Some have an icon that needs to be selected to enable the radio.)</p>	<p>Make sure the ""Airport"" feature is configured and turned on.</p>
<p>Click the "START" button on the task bar then select "Connect To" then "Wireless Network Connection".</p>	<p>If not, select the Apple Button (upper left) >> "System Preferences" >> Network >> Airport and configure it.</p>
<p>In the "Wireless Network Connection" window select "Refresh network list". If CG WiFi is available you should see "CG-WIFI" on the list.</p>	<p>Second, click the ""Airport icon"" in your menu bar (make sure its turned on) and look for ""CG-WIFI"".</p>
<p><i>(If you have other software other than Windows managing your wireless connections you will need to follow the directions from that software.)</i></p>	<p>Select "CG-WIFI" and once it shows connected open your web browser. You will be automatically forwarded to the CG-WIFI Login Page where you can enter your user ID and password.</p>
<p>Once you have "CG-WIFI" listed in available networks. Click on it to connect. Once connected open your web browser. You will be directed to the CG-WiFi Login Page where you can enter your User ID and Password.</p>	

Beginning in February the subscribers to the system will be able to select the level of broadband service they wish to receive. There will be 5 levels of service to select from:

Service	Price
<p>128 Kbs service - 10 Hours per month no email account - no tech support</p>	<p>Free</p>
<p>256 Kbs service - unlimited hours per month- no tech support</p>	<p>\$14.95</p>
<p>1.5 Mbs service - unlimited hours per month - one email account - tech support available during business hours</p>	<p>\$30.00</p>
<p>3.0 Mbs service - unlimited hours per month - one email account - tech support available during business hours</p>	<p>\$40.00</p>
<p>7.0 Mbs service - unlimited hours per month - one email account - tech support available during business hours</p>	<p>\$50.00</p>

Note: Fast dial-up modem speed is 56Kbs

Speeds represented on the table above are for both download and upload and speeds may vary depending on bandwidth traffic on the system. Additional services and level of service plans will be available for business accounts.

Subscribers will be able to pay for their service with their monthly City Utility bill or they will be able to pay for the service online with a credit card. The service is a monthly service - you can change your level of service each month.
